## NDIR Gas Detection Development Kit EOC-GDC-TP-Kit

EOC offers a solution for a faster procurement in your NDIR development project. This kit comes with components that can be matched to your **NDIR gas analysis** requirements. The components are standard, so lead times are short.

Each kit contains 2 to 5 premium **IR emitters** and **IR thermopile detectors** (with optical filters for your gas requirement). They are available for the following gases:

- methane (CH<sub>4</sub>)
- carbon dioxide (CO<sub>2</sub>)
- carbon monoxide (CO)
- nitrous oxide (N<sub>2</sub>O),
- nitric oxide (NO),
- hydrocarbons (HC),
- sulfur dioxide (SO<sub>2</sub>),
- alcohols (-OH)
- sulfur hexafluoride (SF<sub>6</sub>)

Let us know your NDIR gas requirements and we can fit the components to that.
