

Datasheet

PRA-FCA

**FC/APC Fiber-Adapter
with External 1.035"-40 Thread**

The picture shows fiber-adapter PRA-FCA with photoreceiver OE-300-SI-10-FST.

Features	<ul style="list-style-type: none"> • Connects FC fibers (FC/APC connectors with \varnothing 2.5 mm ferrules) to FEMTO photoreceivers with threaded 1.035"-40 free space input (FST-version) • Recommended for photosensitive areas of 0.4 mm diameter or more (coupling efficiency may be compromised for photodiodes with smaller diameter) • Machined from solid stainless steel
----------	--

Applications	<ul style="list-style-type: none"> • Allows to use the same photoreceiver for free-space and fiber applications
--------------	--

Scope of Delivery	PRA-FCA, datasheet, transport package
-------------------	---------------------------------------

Specifications		
General Data	Material	1.4305 stainless steel; glass bead blasted
Dimensions		
	All measures in mm unless otherwise noted.
