PbS and PbSe bare chip detectors on solderable PCBs

2/2020

trinamiX now offers their Hertzstueck brand of PbS and PbSe bare chip detectors on pre-bonded solderable adapter PCBs. This allows customers without wire-bonding expertise or capabilities to benefit from the detectors' patented thin-film encapsulation, pick and place compatibility, small footprint and large field of view. Direct access to the thin-film encapsulated sensor surface without lossy entrance windows is crucial for compact solutions, applications with low signal levels, or optimal coupling with optical fibers.
